

What the Law Makers Are Doing in the Legislature

Resolutions of private members furnished most of the subjects for debate in the legislature of Alberta for the week just ended. The first of the series was that offered by Chris Pattison, Labor, Edson, who asked the government to consider the institution of a system of state medicine and Health Insurance. He showed that such a system had worked well in the European countries where it had been tried out. Six hundred doctors properly distributed in Alberta would lower deaths from maternity complications, reduce infant mortality and improve general health. The Minister of Health, Mr. Headley, introduced an amendment urging continuance of the present efforts towards public health and further study of state medicine. Both Mr. Brownlee and Mr. Shaw were in accord with the general idea but opposed the motion for lack of knowledge as to the probable cost. The amendment carried and Mr. Pattison's motion failed.

The resolution of L. A. Giroux, Liberal, Groulx, asking that Peace River be given telephone connection with the outside world was lost after the Minister of Telephones, W. V. Smith, stated that the probable deficit on such a line would be \$20,000 a year. Mr. Giroux was not convinced but all the other members were, including Hugh Allen, U.F.A. Peace River, who had seconded the motion.

The rest of the day was occupied with the consideration of the estimates for the departments of the Attorney-General and of the Provincial Secretary. Estimated expenditure of \$1,205,308 was voted to the Attorney-General in the face of brisk Liberal criticism. Mr. Shaw and Mr. Webster attacked Mr. Lymburne on the Premier's statement made earlier in the session that the Department was "now costing less than it had in 1921, the last year of the Liberal regime. After a warm argument no apparent agreement was reached except that comparison was difficult because of the changed character of the service given. The vote of \$473,690 for the Provincial Police was held over to give Mr. Duggan, Conservative leader a chance to show why the force should be abolished. On Thursday, Mr. Duggan took up the attack showing how a considerable saving could be made since the Royal Canadian Mounted Police would do the work for \$210,000 plus 45,000 for maintenance and transportation of prisoners. It would not be difficult to care for the enforcement of provincial statutes and the game law separately. He would continue the Enforcement Squad for the liquor law. The day was adjourned by Mr. Lymburne and there will be more of it later.

Estimates of \$84,916 for the Provincial Secretary's department went through quickly after a few questions from the Liberals had been answered. On Tuesday, C. L. Gibbs, Labor, Edmonton, introduced his resolution calling on the federal government to bring in a system of nation-wide unemployment insurance. The member contended that modern industry was responsible for the problem and should bear the burden. The federal government which controls the tariff can best get at the matter. J. T. Shaw, Bow River, the Liberal leader, agreed that something should be done but pointed out that the B.N.A. Act would prevent the federal government from moving. Mr. Brownlee, the Conservative leader, said that the weight might be thrown on the province. Mr. Shaw moved an amendment and the Premier now introduced an amendment to the amendment. It was finally agreed that a compromise resolution should be drafted to which all groups could assent. Mr. Lang, Liberal, Medicine Hat, then followed with his motion calling on the federal government and the C. N. R. to complete the Hanna-Medicine Hat railway as promised long ago. The mover showed that the road would be of great advantage to the flour-milling and brick-making industries of Medicine Hat and Redcliff. He was strongly supported by G. A. Foster, U.F.A. Hand Hills, for the Hanna end of the line. W. C. Smith, U.F.A., Empress reminded the House that farmers along the line should also be considered. The resolution passed unanimously. Mr. Lang's resolution having gone through in record time Mr. Parkyn as next on the order paper was called on. He didn't think

there was time enough before six o'clock p.m. to complete his argument. He begged off but the next one called, Mr. Smeaton, felt likewise. Mr. Parkyn now being called again refused flatly to go on. Mr. Smeaton then agreed to proceed (amid cheers) with his motion asking for the restoration of proportional representation in the cities. Many of the members agreed with the principle but they were not prepared to force it on the unwilling cities. The motion was lost 36 to 7. Mr. Parkyn was given another chance on Wednesday, but again became entangled with authority. While speaking to his motion which suggested that the federal government should place immigration under the Department of Labor he went far back into British history to develop his argument. He went so far back that Mr. Speaker called him to order and admonished him to speak to his resolution. Mr. Parkyn protested and when Mr. Speaker continued firm sat down obviously annoyed. When he failed to respond to the soft suggestion of Mr. Brownlee and of his own colleagues the debate went on without him. The motion was lost. The Labor group was more fortunate in its next motion, that introduced by P. M. Christopher, Rocky Mountain, asking that the government allocate no more coal lands. He showed that Alberta has now 248 coal mines with a capacity of 14,000,000 tons a year to supply a demand for 7,000,000 tons (1929). The Premier was in complete accord and promised that no new mining projects would be authorized. The motion passed unanimously.

The Wheat Guarantee Bill was introduced on Thursday. Mr. Brownlee showed that Alberta cannot lose more than \$1,500,000 at most. Saskatchewan guarantees the margin on two-thirds of the wheat held by the Pool, the remaining third being guaranteed jointly by Alberta and Manitoba. If the Pool handles half of Canada's exportable wheat amounting to 240,000,000 bushels, Alberta will guarantee a ten-cent margin on 40,000,000 bushels. If wheat then dropped ten cents below a dollar the loss would be \$4,000,000 less the assets of the Pool put up as security and amounting to \$2,500,000. The other party leaders agreed with the policy of the government though they felt Mr. Brownlee should give them more information as to what is going on. Mr. Duggan was pleased that the Premier felt so optimistic about it.

Once again the Trackways Bill has gone down to defeat. Sponsored by Donald Cameron, U.F.A., Innisfail, and backed by thousands of petitioners, the plan called for the construction of a system of concrete toll-roads in the province. Opposition to the plan rises mainly from the fear that the road would not pay and that it would have to be taken over by the government. Some members spoke in favor of letting the promoters take a chance but the Premier's decided opposition carried the day against the bill. Mr. Cameron regretted that the Premier who is usually 100 per cent. sound should be wrong in this case. 32 members believed Mr. Brownlee was right once again and 14 voted for the bill. Such a strong demand for better roads cannot be ignored however and the next two or three years may see the government take up the building of all-weather roads.

Redistribution and the new School Bill have still to come down and both must come down this session. Advance information on the School Bill indicating that the dismissal of teachers will be placed under the control of the Inspectors, led to the holding of a mass meeting of Edmonton teachers on Thursday night. Some hostility was expressed towards the Minister of Education. The opposition of the trustees to the new Bill will be dissipated by making the formation of the larger districts optional as in Manitoba. Resistance to the new bill will come from all the opposition groups if gossip can be depended on.

NOTICE RE DOCTORS' GUARANTEE

There are over one hundred signers on the Doctor's Guarantee, but the form will be held open by Mr. Mason for a short time longer to give everyone a chance of signing.

NEWS ITEMS FROM KINSELLA

J. F. Murray was duly elected councillor for Division 5 of the Municipal District of Kinsella No. 424 on Saturday, February 22nd, when he polled 40 votes to his opponent, John Zelinski's 28.

In Division 6 there were three nominated for the office of Councillor, viz. H. H. McDougall, K. C. Carter and K. Overbo. The number of votes secured by each were, McDougall 14, Carter 45, and Overbo 22, K. C. Carter being duly elected.

A. Bradley was elected by acclamation for Division 3.

About forty couples attended the dance sponsored by the committee in charge of social activities at the Lake Vernon school Friday, February 21. A good time was had. The next dance will be held under the same management on Friday, March 7th.

Miss Jessy McBain who has been employed in the Kinsella hotel for the past couple of months, left last week to visit her parents who reside at Leduc, Alta.

Three aeroplanes passed over Kinsella the past few days. One came down from Fort McMurray with a passenger for Kinsella. Not being able to land they returned to Fort McMurray, and the passenger, Mr. Liden, came down by train.

The dance held in Lee's Hall on Friday drew a large crowd and proved a huge success. Horneck's orchestra furnished the music. McVinn Prosser held the lucky ticket No. 29 which won the auto rug. Proceeds went in aid of the Community Skating Rink.

Constable Miller, of Viking, made a couple of visits to Kinsella last week investigating some theft reports.

The Kinsella hockey team motored to the town of Lake Vernon last Sunday and played a game with the Jarow team. The ice was not in very good shape, which handicapped the players to some extent. The score was 4 to 0 in favor of Jarow.

The Irma team played Jarow on the same rink on Tuesday evening last Sunday and played a game with the Jarow team. The ice was not in very good shape, which handicapped the players to some extent. The score was 4 to 0 in favor of Jarow.

NEWS ITEMS FROM JAROW

A most enjoyable dance was given in the hall on Friday evening when the Community Club entertained at a Masquerade. A good crowd was present and the Irma orchestra provided the music in their usual enjoyable way. Some real good costumes were worn by the dancers and the judges had a hard task deciding the winners but at last the decisions were given to Miss M. Dinwoodie, as a Gypsy, for ladies best; Fred Rowland as Uncle Sam for men's best; Mrs. J. Miller, comic, as "half a woman, half a man"; and M. Knutson, as Andy Gump, the men's comic. For best original Aubyn Morby as "Superstitions". The guessing contest with a box of chocolates as a prize was won by Miss Dinwoodie. Lunch was served in the hall and a good evening spent by all present.

The Club will hold its next entertainment on Tuesday, March 11th when the fifth card party of the series which the club have arranged will be given.

The Irma players will present their play "Cranberry Corners" in the hall on March 14th under the auspices of the Ladies Aid. Everyone come and make this night a success.

The Ladies Aid held its regular business meeting at the home of Mrs. I. Matthew on Wednesday afternoon, March 5th. There was a good attendance and plans were completed for the play put on by the Irma players. Report shows fifteen dollars and forty cents cleared at the tea on February 21st. A delicious lunch was served by the hostess.

Mrs. J. D. Manners and Stanley Bridgeman of the Safeways Stores at Wainwright spent Sunday in town.

Mr. and Mrs. Jamieson and family have moved back to their farm a mile east of town, from the Ponoka district where they have been residing for the last few years.

Mr. Geo. Grant was taken to Viking hospital - very ill on Monday's train where he will undergo an operation. We hope for a speedy recovery.

Mrs. Morby who has been in Melville, Sask., for the last month spent a few days at home last week but left for Melville again on Monday.

Mr. Foxwell, of Irma, is starting up a butcher shop in town. We wish him every success as a butcher shop is badly needed here.

Irma hockey team met the local boys on the lake rink again on Sunday afternoon where a snappy game was played resulting in a win for the visiting team by the score of 3 to 2.

Mrs. J. A. Waite is entertaining the teachers, officers and adult members of the Sunday School at her home, two miles south of town on Friday evening.

On Tuesday, February 18th the Joy-spreaders held their annual Mother & Daughter banquet. Mr. and Mrs. Geeson also Miss Price were invited. There were twenty-seven in all who sat down to the table.

We commenced by singing the C.G. I.T. grace, afterwards Marjorie Locke played a piano solo while Elsie Stinson and Mary Jones poured the tea. Then we started on a very delightful supper.

After supper Elizabeth Higginson gave a toast to The Mothers. Mrs. Shaw responded with a toast to the Daughters. Mr. Geeson gave an interesting talk on the letters of "C.G. I.T.". We then sang songs led by Marjorie Locke and played by Miss Price. Mrs. Price Jones sang a solo entitled "Little Mother at Home".

Mrs. Jack again gave a talk on the works of C.G.I.T. while Mrs. Geeson gave a talk to the daughters. The Mothers were then given a chance to speak. Mrs. Locke responded by telling of her appreciation of the C.G. I.T. work. Miss Price then played a piano solo and encore.

The Candle lighting ceremony was carried out. Then we sang "I Would Be True". Mr. Geeson led in prayer and we concluded our meeting by singing Taps. The girls then went to work and cleaned the dishes. Then all went home.

Coming to Irma on March 11th - a Talkie Moving Picture Program under the direction of the University Extension Department.

Clothes don't always make the man when in town. Refresh yourself: Try a First Class Meal or Lunch at the Hotel Irma.

Card Party
WEDNESDAY, MAR. 12th

Production and Marketing Problems

The question of disposing of surplus farm products in an orderly manner, and thus prevent disastrous breaks in prices by reason of the throwing of a large portion of the surplus on the world's market at one time, all with a view to securing to the producer a fair margin of profit over and above costs of production, is not peculiar to the wheat growers of Western Canada. It is a problem which confronts agricultural producers in many countries, and applies to other products than wheat.

Governments and producers are grappling with the problem. In Canada it is wheat; in the United States it is wheat, cotton, and, as affecting its overseas possessions and Cuba, in which the U.S. takes a friendly interest, it is sugar; in Brazil and other South American countries it is coffee; in certain British colonies it is rubber.

In each case the problem is a most complicated one. Such factors as world consumption, world production, fluctuating with variable seasons from under-production to over-production; the ability of importing countries to pay the price demanded as fair by the producing and exporting countries; different seasons and methods of marketing; costs of labor and marketing in one country as contrasted with those prevailing in other competing countries, all enter the picture and call for consideration.

In the Argentine, for example, orderly marketing as we would develop it in Canada is impossible, because of the great quantities of wheat and country there is no elevator storage system. When the crop is harvested it must be rushed on to the market at once, and the growers are obliged to accept the price they can get for it at that time. If the crop is large, or if there happens to be a substantial world's surplus at the time, the effect is to force down world prices, with resultant loss, not only to the Argentine grower, but to wheat growers everywhere. The Canadian Wheat Pool had to face just such a situation in 1929-30.

In the United States a Federal Farm Board has been created and given a huge sum of money to use in an effort to stabilize prices of agricultural products in that country. That Board is now facing its first test. It has called upon the farmers to reduce production of cotton and wheat in 1930, by planting smaller crops. Will the farmers as a whole, or even a majority of them, respond? Or will the individual farmer act on the belief that, inasmuch as other farmers will follow this advice and prices thereby be raised, it is a good opportunity for him to increase his own production and secure the benefits provided as a result of the proposed general reduction? If so, then there is grave danger that a greater surplus than ever will be produced. Or, if the United States farmers do follow the advice and reduce production, will advantage not be taken of it by wheat growers in competing countries to increase production, thereby defeating the object aimed at in world markets, and reap any benefits resulting from the sacrifice made by the United States?

In a word, can the volume of production of such a world commodity as wheat be controlled? It is possible to control the output of manufactured articles, say, automobiles, furniture, clothing, but can the production of nature's own goods from the soil be controlled in like manner by any artificial means, or must that be left to nature itself through the vicissitudes of the weather—drought, too much rain, plant disease and insect pests?

Great Britain tried the experiment of controlling the rubber markets of the world. For a time it succeeded, but just as soon as the world consumers of rubber felt the pinch of too high prices, steps to increase production in various ways were taken. Or take the case of coffee. Brazil produces two-thirds of the world's supply of coffee. In 1924, when prices were low, the Brazilian government, to prevent a price depression, in 1924 organized the Coffee Defense Institute. The Institute was not empowered to buy, but merely to see to it that coffee was kept in the interior, and released to exterior markets only when and as the demand and price-level were favorable. In the first few years of operation the Institute's aim was realized. The 1924-25 crop prices were almost exactly double the prices for which the 1922-23 crop had been sold. But there was one inevitable outcome. Higher prices for coffee, and the restriction on Brazilian exports stimulated the output of other producing countries, with the result that Brazil no longer influenced the world market as much as previously. Whereas coffee sales for all other countries before the war were only 6,000,000 bags a year, today it averages around 9,000,000 bags. Furthermore, Brazil went in more extensively for coffee growing. Following an average output of 14,000,000 bags annually during the decade beginning 1917, the crop production in 1927-28 reached the unprecedented total of 28,000,000 bags, or well above the estimated world consumption of 22,000,000 bags a year.

Then came the inevitable result. In October last, prices broke, and in January of this year prices, for coffee were just one-half what they had been at the same period a year before. As a result there is in Brazil today a curtailment of credit, much unemployment, a cutting down of production of municipal undertakings, a loss in foreign contracts, and a lessening of buying power in the other coffee countries of Colombia, Venezuela, Costa Rica, Guatemala, Salvador, Nicaragua, and Ecuador. The estimated world's supply of coffee for 1929-30 is 45,000,000 bags, while the world's requirements are placed at 23,000,000 bags, leaving an unusual surplus on July 1st next, to carry over of 22,000,000 bags or nearly one-half of the total.

One of the leading United States agricultural writers, "Wallace's Farmer," published at Des Moines, draws a lesson from "the sad state of Brazilian coffee and British rubber," saying: "Whenever an industry gets into position to control price, it is important to forget about cost-of-production theories. In a case of this sort, the only excuse for studying cost of production is to get an idea as to the point at which prices must be held in order to discourage other people from coming into the business and killing the goose that lays the golden egg, by stuffing her to death. The important thing is to hold the price, a little too low, and apparently this is the one thing which organized farmers find it very difficult to learn."

Direct attacks are also made on the U.S. Federal Farm Board's plan to curtail production. One lead newspaper declares: "It is a distinct disservice to agriculture and to our economic structure in general to preach the doctrine of a sharply curtailed agricultural production. For with such curtailment must go migration of population from the farms to the cities, and with that either increased factory production creating the same problem of oversupply that now exists in agriculture, or an aggravated unemployment problem."

The magnitude of the problem confronting our farmers, our Wheat Pools, our financial and business men, our Governments, can hardly be overestimated. Because of the very magnitude of the problem, and the results which will flow from success or failure in finding a solution, it is the duty of all our people, in city and country alike, to stand unitedly behind those who are earnestly seeking a solution, and who are carrying an extremely heavy burden of responsibility at this time. It is a case where all must pull together, where carping criticism should be silenced, and the professional pessimist and preacher of blue ruin squelched.

Norway Has Open Winter

Warmth Of Gulf Stream Has Kept Temperature High

Fansies are blooming in Norwegian gardens. Flowers are in evidence, and only far inland is there enough snow and ice to provide the customary winter sports.

This changing climate of Norway is attributed by scientists to the

rising temperature of the Gulf Stream. This year the stream has been several degrees warmer than usual, and its warm western winds have repulsed the northern and eastern blasts that usually give the country a severe winter.

Norway has so far had no winter at all except in the inland districts beyond the reach of the tempering coastal winds.

Foretold Use Of Steam

While the date of the invention of the locomotive is usually placed at 1829, Solomon de Cause, a Frenchman, published a book early in the 17th century concerning the "pushing of carriages and ships by boiling water and making steam." He was put in an asylum in 1630.

Minard's Will Kill Corn.

Made Wonderful Flight

Albatross Kept Up With Ship For 3,000 Miles

The flying powers of the albatross are well known, but news of an almost incredible feat of endurance has just been reported by officers of a Pacific liner from the Far East. For six days and nights an albatross followed the vessel, which averaged seventeen knots, and it was only when a school of fish was sighted that the bird abandoned the chase in order to feast. It was estimated that the bird had flown 3,000 miles, and what is more remarkable had apparently gone without food all the time.

SUFFERED FOR YEARS FROM NEURITIS

Electric Treatment and Osteopathy Proved Of No Avail

To suffer for four years from neuritis. To try electric treatments, osteopathy, have teeth and tonsils removed without receiving the least benefit was the experience of Mrs. Simon Rae, of St. Mary's Ont. Today, however, Mrs. Rae is a well woman—thanks to Dr. Williams' Pink Pills. These Pills did for her what all other treatments had failed to do. They built up her blood and banished all the aches and pains.

Concerning the treatment and relief Mrs. Rae says: "I was a sufferer from neuritis and rheumatism for four years. I was almost a cripple and the pain I endured was terrible. I took sixty electric treatments without the least benefit. On advice I had all my teeth out. Then my tonsils but still no benefit. I then tried osteopathy and though I persisted in this treatment for six months I was no better at the end than at the beginning. I was a young woman living on a farm and found the greatest difficulty in doing the least work. My mother finally advised me to try Dr. Williams' Pink Pills, and more to please her than anything else I did so. Imagine my joy on noticing an improvement in my condition after having taken only a few boxes. I continued their use and now the pains and aches have left me and I am once more able to do my work about the house."

Neuritis and rheumatism, coming with this impure blood and can be driven out by enriching and purifying the blood. Dr. Williams' Pink Pills have been recognized for years—the world over—as a wonderful blood purifier and nerve tonic. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

When Caesar invaded Britain, he found the Britons using horse-drawn chariots to carry the fighters quickly to strategic points.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

A debutante tells me she doesn't believe in love at first sight. She says you should at least wait until he bangs up his hat and coat.

Specialists Are Puzzled

Hungary's Sleepless Man Has Not Closed Eyes For Fifteen Years

Brain and nerve specialists of Central Europe are puzzled by the astonishing case of a Hungarian Government official who has not slept, nor even closed his eyes, since he was wounded by a Russian bullet in 1915.

The sleepless man is M. Paul Kern, who, despite his affliction works daily in one of the ministries of Budapest. His case is one of the most amazing phenomena of the Great War. It was in one of the early battles on the eastern front that M. Kern received the wound that was to turn his life into a nightmare. He volunteered as a cadet on the outbreak of war, and soon won recognition, being decorated with a gold medal for bravery. A year later he was transferred to another corps, with which he again distinguished himself in the defence of an important sector.

On the third day of the battle a Russian bullet found him, and he recovered consciousness in a Lemberg hospital before being transported to Budapest.

From the moment he opened his eyes in the ward at Lemberg, M. Kern never slept again; nor, indeed, has he the slightest desire to do so. His case has been studied by the brain and nerve specialists of Budapest, X-rays have revealed nothing, and, in spite of examinations made over a number of years, Dr. Frey, a noted professor of the university, has been unable to put an end to M. Kern's strange condition.

A curious feature of the case is that, apart from an occasional headache, the sleepless man suffers no ill-effects from his constant wakefulness. For years he has never gone to bed. His work shows not the slightest signs of deterioration, and he helps orphans and invalids with whom M. Kern daily comes in contact have nothing but affection and praise for their fellow victim of the war, whose fate has taught him to be sympathetic and patient with others more unfortunate than himself.

At first M. Kern tried to sleep, but hours of wakefulness in bed exhausted him more than the present "rest" which takes him every night to cafes, clubs and other joyous haunts of Budapest.

His daily and nightly routine works out as follows: Work from 9.00 a.m. to 2 p.m.; writing and reading, 2 p.m. to 6 p.m.; round of the night clubs, 7 p.m. to 7 a.m.; bath; change of clothes, breakfast, then work again.

The Need Of Hour

The gentleman, who asked over the radio what is the most important thing in the world is hereby informed that the most important need in the world is for men who will stand before the microphone and say less and entertain more.

Persian Balm—the ideal toilet requisite for every discerning woman.

Perfect in results. Creates complexion of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly the least in texture. All day long women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

Sugar Beet Acreage

Sugar beet acreage was increased to 3,470 in the Lethbridge region during 1929, or an increase of 1,188 over 1928, and comparing with 752 acres in 1925.

Time Has Tested It—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands.

It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Soviets Seize Jewelry

Diamonds, precious metals, jewelry, foreign currency, antiquarian articles and other private property amounting to 100,000,000 rubles, (about \$50,000,000), have been seized from private traders and other classes in Moscow, described as "parasitical" for payment of taxes owed to the government.

Regina Building Permits

Final figures of building permits for Regina show contracts just exceeding ten million dollars, or \$10,022,531, as compared with \$6,619,206 in 1928.

Use Minard's in the Stable.

Has Rendered Great Service

Value Of General Smuts' Mission Recognized As Important

A cable despatch from Capetown reports that General Smuts, former South African Premier and famous as a soldier and statesman, has been welcomed home from his visit to Great Britain, Canada, and the United States, with the utmost enthusiasm and with expressions of high appreciation of the mission that took him away. This is understandable, for the value of General Smuts' mission has been widely recognized as important. In Great Britain and Canada the former South African Premier rendered a service to the whole British Empire by his constant emphasis upon those principles that make for enduring, inter-empire relationships, and to the cause of world peace by his earnest appeals in behalf of the League of Nations and for Empire unity in support of the aims of this and other movements interested in peace and goodwill in the world; and in his addresses in the United States he served to arouse new interest in the Geneva organization in a country that has held aloof from association with this body, and perhaps to an extent that may help to yet bring it into definite association with it.

General Smuts, in his recent swing around a considerable and important section of the world, revealed himself a constructive world statesman—Regina Leader.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

C.P.R. Farm Land Sales

Canadian Pacific farm land sales, made through the Department of Natural Resources, covered more than 400,000 acres in 1929, according to S. G. Porter, manager of the department. More than 200 sales were made in the company's irrigation block, eastern section, near Calgary.

Production of rayon in Italy is growing rapidly.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Sani.

Use Para-Sani to keep Dad's lunch fairly fresh.

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

YOU'LL FIND A hundred useful, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged packages. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

Enormous Annual Losses Suffered By Farmers Due To Ravages Of Smut And Other Plant Diseases

The word disease generally brings to our minds a suggestion of some ailment which has fallen to the lot of man or beast. It rarely occurs to us that plants are subject to a line-up of disorders which would make the average sufferer from human ailments, well by comparison. It is also true that the cost of plant disease is quite comparable to the money spent every year for doctor bills and the money lost through sickness.

Take our common smuts for example. They are plant diseases which we come to consider the matter, and the are among the most expensive luxuries which the farmers of Western Canada annually indulge in. In fact they probably cost the average farmer considerably more than the car, for we learn that oat smuts alone cost the farmers of Ontario two and one half millions. If a horse is laid up for a quarter of the year with a bad swiney we soon think of the money it is costing to feed him, but smut can slip in and take a quarter of the oat crop and the loss is never noticed.

The smuts are bad enough, but as every farmer knows they are largely preventable. The worst offenders are the rusts, they are harder to deal with and, while the development of rust resistant varieties of wheat is now only a matter of time, we still lose several millions annually to those little spots on the stems which might be called the smallest of plants.

But the smuts and rusts are only a beginning. There are cankers and galls, the potato has an imposing lineup of blights, rots and scabs, the fruit trees have their diseases from root to fruit. The loss caused by plant diseases each year is very nearly as great as the national debt. Most plant ailments are now preventable in the same way that science has gotten most human ailments under control, and with the additional possibility of breeding disease resistant plants, it is likely that in the next few years we shall see a decided reduction in the losses due to the diseases of plants. It is interesting, however, to remember that our human ailments are not the only ones which prove costly and which reduce our national efficiency.

The Souvenir Hunters

Do Not Consider Taking "Tokens Of Remembrance" As Theft

At the opening of the latest great New York Hotel, the loss of property taken by souvenir-hunters constituted a record. The biggest attraction was of flat silverware, of which an enormous amount was taken. There was also a great disappearance of salt and pepper sets, silver ash-trays and other appurtenances of service even to sugar bowls. It was said that such articles were carried off literally by hundreds. Even a number of soup bowls were somehow snatched out of the place. There was less looting in the hotel rooms, apparently, although this branch of the service also suffered heavy losses. Mostly it was the new towels that were in favor with the guests as tokens of remembrance. No doubt many persons looked lovingly at the new bedspreads and blankets and smaller rugs, but abandoned with regret the idea of getting away with anything so cumbersome. Nevertheless, much ingenuity was shown in the abstraction of some fairly bulky articles from the rooms. Several telephone instruments were taken, as well as several dozen leather-bound writing tablets, one boudoir lamp and a collapsible bench and a great number of new style clothes hangers. The people who took all this property, of course, are not thieves—they are merely souvenir hunters.

"Your uncle is 90 and still mentally active?"
"Yes, he plays chess every evening."
"Is he still physically active?"
"Rather." If he does not win he hits his opponent over the head with the chess board.—Flegende Blätter, Munich.

Germany's Surprise Ship

Brains and Science Have Gone Into "Pocket" Battle Cruiser

Germany is setting an example which may be epoch-making. Traditionally, size is the prey of brains. More brains and science have gone into the famous German "pocket battleship" now building than were ever packed before into one hull. Contrived with original force of research, thought and skill, the "Eratz" Friseur, though of only 10,000 tons displacement, will be a match for any warship up to twice her size now afloat. When complete—others of her sort are to follow—she will be incomparable as a blockade-breaker and commerce-destroyer. As a hunting and fighting ship she reduces to insignificance the cruisers of equal displacement, 10,000 tons, which have caused the prodigious fuss between America and Britain. The German "pocket-battleship" is wonderfully designed to sink nearly all the warships that could catch her, and to escape the few that could sink her.

Not Ready For Zoo

Horses Are Being Used More Than Ever In Chicago

Not long ago the city fathers of Chicago were thinking of setting aside a pasture in Lincoln Park Zoological Gardens for the horse as a rare animal, but now city life is offering excellent careers for young horses willing to work as haulers of milk wagons, ice vans, and fruit trucks, with the prospect of a nice green field in 20 years. Horses have shown a remarkable revival in Chicago, where 10,741 horse-drawn vehicles were registered in the first seven months of 1920, as against 11,986 in the whole year of 1919.

(By Anabelle Worthington)

Of course you'll want a blouse of eggshell crepe satin with the new flattering scarf collar with flying ends at back.
This one is a beauty because of its interesting flat neckline that is shirred at center-front, creating lovely swathed movement.
The long tight sleeves are fitted with darts below the elbows.
Style No. 3294 is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It is most effective worn with black crepe silk skirt. This eggshell shade also blends beautifully with almost any other shade you might select later for your ensemble, so will prove its economy.
Flat silk crepe in eggshell shade, more silk in lettuce green, yellow chiffon, emerald green silk crepe, white crepe de chine, peach-pink crepe satin, honey-beige chiffon and navy blue crepe silk are charmingly appropriate for immediate and later Spring wear.
Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Saskatchewan Third In Dairy Production

Figures For 1928 Show Ontario, and Quebec Ahead

The province of Saskatchewan is firmly entrenched as third among all the provinces of the Dominion in dairy-production, according to a recent bulletin issued from the provincial department of agriculture. The report includes production to the end of 1928.

Of the 14,512,897,861 pounds of milk produced in the Dominion during that year, Saskatchewan provided 1,178,703,547 pounds as compared with Ontario's 4,473,879,975 pounds, and Quebec's 4,553,280,809.

The other provinces, in order of production, were: Manitoba, Alberta, Nova Scotia, New Brunswick, British Columbia and Prince Edward Island.

Total milk production over Canada for 1928, was not as high as in 1926 and 1927, but was in excess of 1925.

The bulletin also shows the distribution of milk. It shows, for Saskatchewan, that 397,970,000 pounds was used in the making of dairy butter, and 264,778,711 pounds in the manufacture of creamery butter during 1928. Home production of cheese was small as compared with the factory output, being only 203,190 pounds, as against 1,869,000 pounds.

There are a few comparisons which somewhat challenge the standing which total milk production figures gave certain of the provinces. Though Ontario was first in that regard, Quebec outdistanced her in dairy butter production, while Alberta headed Saskatchewan in total creamery butter production, as well as in home and factory manufacture of cheese.

Suggests Settlement Plan

Soldiers' Settlement Board Supervisor Has Idea Of Colony

A scheme for future land settlement was outlined at Hudson Bay Junction before the Royal Saskatchewan commission on immigration and settlement by Captain A. A. Batchelor, supervisor of the Soldier Settlement Board for the district.

"A block of land, consisting of a township or more, should be selected," he said, "and fields of 50 acres cleared and cultivated on alternate sections. A main road should be built and a barn and water supply provided for each farm. A school and a central community hall, which could be used as a church, should be built. Then, selected families from Great Britain should be placed on this land, which would be sold to them at the actual cost of improvements."

The taking of such land, according to Captain Batchelor's scheme, would mean the forfeiture of any homestead right. He would have the alternate sections tilled in the same manner after a period of two years from the first settlement, and these thrown open to Canadian people on the same basis.

LEADING AGRICULTURIST

With fifteen years practical experience in agricultural and livestock affairs and having represented Canada on an Imperial committee to study the meat supply of the British Empire, Leonard Christie McQuat has recently been appointed general agricultural agent of the Canadian Pacific Railway. He was born at St. Andrews East, Quebec, in 1892, and took his degree of Bachelor of Science in Agriculture at McGill University. After returning from military service in the war, Mr. McQuat was called to Ottawa as bacon specialist of the Dominion Livestock Branch, Department of Agriculture, and, following a special study of the British meat market, was selected to join the first Imperial Economic Committee to investigate and report on British Empire meat supply which met in London, in 1925. His wide knowledge and experience are now at the service of the Canadian Pacific Railway.

Studying Cement Treatment

Saskatchewan University Professor Spending Some Months In Berlin

Professor Thorvaldson, of the University of Saskatchewan, being cement expert, is here conferring with Prof. Wilhelm Eitel, of the Kaiser Wilhelm Institute for the Advancement of Science, with a view to finding methods of improving cement.

Prof. Thorvaldson explained he was particularly interested in observing the X-ray work on crystals, carried out by Prof. Eitel, who is one of the greatest authorities on silicates.

"In our part of the country, cement is an important commercial article, and everything that can be done to improve its quality is of vital interest. I am thus combining scientific research with practical purpose by seeing in what way Eitel's methods can be applied to cement," he said.

Prof. Thorvaldson expects to remain here for three or four months.

Tennis by artificial light is popular in Australia.

Study Of Dairy Conditions In Canada During The Past Decade Is Well Worthy Of Attention

Canada's Exhibits At the Poultry Congress

Each Province Is Working On Its Own Display

Canada will occupy a conspicuous part in the forthcoming World's Poultry Congress. No pains are being spared to take full advantage of the opportunities provided in putting up exhibits that will be a credit to the country.

The national exhibit being prepared on an elaborate scale by the Live Stock Branch of the Department of Agriculture, at Ottawa, will demonstrate clearly the policies that have developed the Canadian poultry industry to its present enviable position, but will also show the effect of the policies in operation upon poultry and egg consumption.

The provinces are equally active in preparing their displays that will draw attention to not only the poultry industry, but other activities of world interest. The Maritime Provinces are getting together in putting up one exhibit. The three Prairie Provinces are co-ordinating their forces in a similar manner, while the other provinces are each preparing elaborate displays for definite spaces that have been allotted to them in the great Crystal Palace.

The Live Birds Exhibit of one thousand head, including chickens, waterfowl and rabbits, is being arranged on a national scale, and will include representatives not only of the hardy, high-producing stock of the most popular birds, but will also include representative specimens of what are sometimes termed "Fancy Breeds," including waterfowl and pigeons. The exhibits will be a credit to Canada.

Another Non-Sleeper

Man In England Claims He Has Been Awake Twenty Years

An amazing record is claimed by E. T. Maher, of Heaton, Newcastle, England, who affirms he has not slept for 20 years, according to the Manchester Guardian. Mr. Maher, who works as a store keeper in Newcastle, was known as the battalion "caller up" whilst serving with the York and Lancaster Regiment during the war. He has undergone several operations, but the doctors are still baffled. It is stated that they can neither explain the affliction or cure him.

Always throw a drowning man a rope, even if he's trying to commit suicide. If the water isn't deep enough, he may want to hang himself.

Used To Credit Sales

Clerk Was Astonished When Offered Cash For Purchase

A New York paper says: A big merchandising event came recently when a young couple from out of town, who have just settled down in the East Nineties, went to Sloane's to buy some chintz curtains. They gave the clerk who waited on them the exact amount of the purchase in cash. He stood staring at the money. "What's wrong?" asked the husband. "Well, sir," said the clerk at last, "I've worked here many years, but I never made a cash sale before and I—scarcely know what to do with the money."

Byron's Home Purchased

Historic old Newstead Abbey, famous as the ancestral home of Lord Byron, has been purchased by Sir Julien Cahn for presentation to the British nation unconditionally. Sir Julien is a noted philanthropist and sportsman. By owning a half share in the Stock Exchange sweep ticket on Trigo, Derby winner of last year, he won \$310,000.

"May Providence grant you every thing good in the New Year." Mrs. Newrich: "Thanks. We are not dependent on the charity of others."—Jugend, Munich.

VIKING

Mr. Brook, representing the Calgary Power Company interviewed the town council and citizens generally here last Friday and Saturday in regard to the proposed power line to be constructed from Camrose via To-field this spring.

Mr. Brooks visit was in the nature of a preliminary survey as to the volume of business at the company might expect should they decide to extend their lines to Viking. He was quite satisfied with the prospects and intimated that he would make a favorable report to his company.

The company will ask the Village for a ten year franchise before any work is commenced. The Council will put the matter before the ratepayers in the form of a plebiscite when the question will be voted upon.

Many citizens and business men have expressed a desire to see the power line brought in. The citizens in all towns from Tofield and intermediate points are also favorable to the project.

The climax of the local bonspiel that has been going strong the past ten days, was reached Tuesday evening when the Angus Ross rink and the Pickering rink, skipped by N. C. Graham met in the finals of the Grand Challenge.

The waiting rooms and the board walk along sheet of ice No. 1 were lined with spectators to see the playing of this annual classic.

Mr. and Mrs. W. E. Henton arrived here on Saturday and have taken over the management and ownership of the King Edward hotel. Up until about two years ago they conducted the hotel at Westlock before moving to Edmonton. They have had some experience in the hotel business and have highly recommended as citizens and an asset to the community. The business men and citizens generally join in extending a welcome to them.

Emil Miller left Tuesday evening for Edmonton where he will make his future home. For the past fifteen months he has been proprietor of the King Edward hotel and has made numerous friends who wish him success in any thing he may undertake to do in the future.

The regular monthly meeting of the Anglican W. A. will be held in the Parish Hall, March 13th at 8 o'clock. Miss Lillington, newly elected President of the W. A. for the Edmonton Diocese, will be a visitor. All members please try and attend and help make the meeting interesting. Hostesses for the afternoon, Mrs. Taylor and Miss Richardson.

The roads to Vegreville are in pretty fair shape as reported by W. J. Brown who has been assisting his father and brother who reside in that town and who have been ill for the past week.

Mrs. Geo. A. Loades was the lucky holder of the winning ticket in the raffle for the young Shorthorn Bull put on by the Anglican Church in aid of their Building Fund.

E. C. Thomson, nephew of Fred Thomson, six miles northeast of town left on Thursday on his way back to the Old Country.

Mrs. W. E. Henton left for a few days stay in Edmonton on Monday evening before taking up residence at the King Edward hotel.

Mrs. Wm. Thompson will entertain the Quinte ladies auxiliary at the home of Mrs. T. A. Cox on Thursday, March 20th.

Miss Flora McDonald visited with friends in Calgary last week.

C. Broughton, Sr., left last week for Cleveland, Ohio, where he will spend the summer.

Miss Vera Alexander visited with friends in Edmonton the first of the week.

There will be a Home Cooking Sale on Saturday, March 8th in Collier's Garage at 2 o'clock.

Mr. and Mrs. Ole Lund left for a visit to Edmonton the first of the week.

A car load of New Hart Parr Tractors was unloaded last Wednesday.

There will be a Home Cooking Sale on Saturday, March 8th in Collier's Garage at 2 o'clock.

Mr. and Mrs. Ole Lund left for a visit to Edmonton the first of the week.

Andrew Holmberg left on Tuesday evening on a business visit to Edmonton.

A concert under the auspices of the U.F.A. and the U.F.W.A. locals will be held in the schoolhouse on Friday, March 14th.

Mr. and Mrs. J. M. Doward who have resided on the A. W. Thompson farm for the past year have moved and are living with Mr. David Doward.

Mr. A. W. Thompson who has worked for Mr. P. A. Jardine in Ranfurly for the past year or so will likely be farming again this year. His family will continue to reside in Ranfurly.

Tractor schools are being held here on Monday and Tuesday of next week. The John Deere on Monday and the Hart Parr on Tuesday.

IRMA TIMES

The Alberta Oil Gazette

H. W. LOVE, Prop.

A Good Advertising Medium and a Reliable Newspaper on Oil Activities

March came in more like a bear than a lion, but we haven't seen anybody discard their fur coats yet. Now it behaves and departs like a lamb, the winter has been one of the finest on record.

The carelessness of editors in permitting mistakes to occur in their papers is illustrated by the fact that in an ordinary newspaper there are only 10,000 pieces of type; there are only seven wrong positions that a single letter may be put in; there are only 70,000 chances to make an error, and a few million chances of making a transposition. In the short sentence "To be or not to be," there are only 2,759,022 chances of making an error by transposition alone.

The country is again being flooded with mail order catalogues. Unless the people of the country towns co-operate more closely against the schemes for scooping business out of the country towns into the big cities, there won't be much left to the country towns. Too many business men used to think it was none of their business when some scheme was being worked to take business away from other lines of business than his own in the town. Now they are beginning to discover that it is only a question of time until some scheme is started to take away their own business. The business man who sends away for things out of his line that can be procured in his home town has no kick coming if people send out of town for goods that he has for sale.—Ex.

The Wastebasket

Suggestions for reducing traffic on the highways: Prohibit the operation of all cars that are not paid for.

The trouble with good resolutions is that they are generally made the morning after.

Heard at the schoolhouse: Teacher: "What was there about George Washington that distinguished him from all other famous Americans?" Pupil: "He didn't lie."

"See this old hat of mine," said a local lady to her husband, "it is the one I wore when you fell in love with me." "Well, it proves that I must have loved you a lot to pick you out with that thing on your head," he replied.

"The man I marry must have an income running up to five ciphers," declared a Jarow girl when a Kinsella fellow proposed. "Marry me; mine's all ciphers," he replied.

"Look here, you're giving me a big piece of bone," said a citizen, when buying a piece of meat in a Bruce meat market. "No, I'm not," the butcher replied, "you're paying for it."

Very few of the young people around here can talk more than one or two languages, so in order to prepare them for any possible emergency, we give the following ways of saying "I love you," in the various languages of the world. If you are in Greenland all you have to say to convey this tender sentiment is "Un ivigasserdilunilerfironajunarsig, guajk." Or if the beloved talks any of the other languages you could remark as follows:

Italian—Vi amo.
French—Je t'aime.
Polish—Kocham cie.
German—Ich liebe dich.
Arabian—Bahabbek.
Armenian—Yes Kee Seeren Kez.
Chinese—Ono Ngai Ni.
Japanese—Watakusiwa Anuta Su-ka Masu.
Malay—Dikasi Uleh Hambu.
Persian—Chouma ya Doust Darem.
Danish—Jeg holder af dem.
Yiddish—Ich lieb dir.
Hebrew—Ani ohev asoch.
Egyptian—Nacheque.
Portuguese—Eu Vos amo.
Rumanian—Ve Iubesc.
Russian—Ja Vas Lioubliou.
Spanish—Te Quiero.
Greek—Sas Agapao.
Swedish—Jag Tycker om Eder.
Turkish—Ben Seneye Sevegyorum.
Annamite—Toi Thu'ng be Lam.
Hawaiian—Sui Kouou Aloha No Oe.
Dutch—Ik Bemint U.
Hungarian—En Oni Szeretem.
Hindo—Main Tym Ropijar Karyn.
Cambodian—Khnhom Narkh Sre-lanh.

Household Hints.

RUGS FOM SILK HOSE
AND UNDERWEAR

A few years ago thrifty mothers who were in the habit of making mats and quilts from all the worn out garments, felt rather badly about the waste of the discarded silk hose. But now the mothers have discovered that worn out silk hose and underwear make beautiful crocheted mats for the bedroom or bathroom. Even if the runs are numerous and wide, they can still be used.

It is a good plan to save until you have quite a number of pairs on hand, so as to arrange the colors of the mat better. As you put them away in a bag or box, cut off the feet, also the tops if they are of lisle, and fold the different colors together. This makes less work sorting when you are ready to start your mat. The types make good wash rags or pot holders. Some stockings or underwear will do nicely without coloring, but a very little dye goes a long way in coloring silk, and will make a big improvement in the mat. Some cut the strips and some some of the lengths together before coloring. Do as you like about this; but at any rate, cut off all of the discards before you start to dye the silk.

The width of the strip to crochet depends on the thickness of the material. Medium weight silk hose should be cut about one inch wide, the chiffon hose a little wider, and underwear, which is unusually heavy, a little narrower than an inch, depending on the weight. To cut, put two or more hose one inside the other with back seams matching. Insert the hand in the inside stocking and spread the fingers out. Begin cutting from either the top or bottom of stocking. Cut around and around, so that when finished each stocking will be in one long strip. Cut the underwear around and around the same way. Some sew each coil together and wind into a ball before they start to crochet. Do as you prefer about this.

A large wooden hook can be purchased for this work. Make the mat any shape you choose. Some have difficulty in getting the mat to lie flat. If you anticipate trouble of this sort, perhaps it would be better to start with an oblong mat, like a strip of the old fashioned woven rag carpet. There is an advantage in a mat of this sort; for the rags look very much like a rug, and you can crochet a few strips as you have them instead of waiting for enough to complete the rug. For a square or oblong rug, crochet a chain about six inches longer than you expect your mat to be in width when finished; crochet back to the end of the chain, crochet one extra turn and single crochet (putting the hook through one loop), to the end of strip. Chain one extra for the turn at each end, and continue to work from one end until the mat is long enough. Press with a damp cloth when completed.

In making a round or oval mat, sort the colors so as to have the different shades graduating. If you are planning on a round mat, start the centre with a chain of about five stitches, if oval, start with eighteen or more. Turn, crochet one in each stitch. At the end where you turn make an extra stitch. Continue around and around, single stitch, widening at the ends and sides as you see fit. Lay the mat flat on the table occasionally, and see that it is not frilly, too much widening, or drawn, not enough extra stitches. If either is the case, unravel and correct your mistake. If you have a darker shade such as red, navy or black, keep it for the outside so as to form a border. Like other things, you learn to do by doing. You can always make a second mat better than the first.

INCREASED WHEAT
DEMAND EXPECTED

Ottawa, March 12th—According to well informed sources here, an increased demand for Canadian wheat from Europe, with an improvement in prices may be expected shortly. This is due to the fact that while stocks are fairly large at Liverpool they are small at many of the Continental European ports. While the crop estimate for Australia has been increased that for the Argentine has been reduced, and thus there is no material change in the world's crop. In many of the European countries, particularly Germany, Italy and Austria, prices have risen in relation to the Canadian price, and it seems likely that the imports of these countries will increase.

Germany for a while exported considerable quantities of wheat to Great Britain; it now seems likely that this country will have to import, and thus will not be a factor in Canadian competition for the British market.

Farmers Mutual Lumber Co. Ltd.

— At Your Service —

When it comes to building material we have the best that money can buy. Good clean Fir dimension, Spruce Shiplap and Common Boards. We also have several special buys in V Joint half inch and the regular one inch stock, also Flooring and Siding at a Special Price. We have in stock 3-Ply Fir Veneer, just what you want for the odd jobs around the house. How about some Storm Sash? They save fuel and pay for themselves in about two years.

WORLD HAPPENINGS BRIEFLY TOLD

The ships of the Byrd Antarctic Expedition, bringing Admiral Richard E. Byrd and his men home from their base on the Ross ice barrier, are expected to arrive at New York about the first week in June.

Residents of the South Australian village of Chicago, have been reading about the other Chicago, and so they voted to change the name of their city to Booth, in honor of the late General Brannwell Booth, for years head of the Salvation Army.

Courses of instruction for non-commissioned officers and constables of Royal Canadian Mounted Police, in methods of combatting narcotic smuggling are expected to give good results, according to the report of the force tabled in the Commons.

Dr. J. W. Shipley, for 11 years professor of chemistry at the University of Manitoba, has accepted the position of head of the Department of Chemistry at the University of Alberta. He will take up his new duties at Edmonton in the fall.

Negotiations with the Canadian Government for the removal of the embargo on British potatoes have not proved successful, announced the Rt. Hon. Noel Buxton, Minister of Agriculture, in the British House of Commons, London, England.

A bill aiming to prevent criminal proceedings for so-called religious blasphemy, heresy and atheism has been withdrawn by its sponsors as a result of the British Government insisting on a safeguarding clause as the price of its support.

A request that the eleventh day of November in each year be set apart as a national holiday and a day of remembrance entirely separate from Thanksgiving Day is being placed before Parliament by the Canadian Legion of the British Empire Service League.

Making Long Journey

Turkey From Alberta On Way To West Indies

A turkey from the farm flock of Mrs. R. Leckhart, Bowden, Alberta, is on his way to his new home in the West Indies, having been shipped to the Misses Boyd Stimpson, of Fort, Jamaica, reports G. M. Cornale, Alberta poultry commissioner.

This bird was selected by R. S. Johnson, president of the Alberta Bronze Turkey Breeders' Association, and shipped to Halifax, where he was loaded on shipboard for his destination. A special crate was constructed to carry the feed and water required by the turkey during his five-thousand-mile trip.

We are not much of a cook, but we do know better than to boil two cups of rice for two people.

Don't Get Bald!

Use Minard's. A recognized hair grower for fifty years. Apply to scalp steadily four times a week.

Opportunities Of A Lifetime

Interesting Tours Arranged For Attendants At Poultry Congress

The opportunity of a lifetime is really what is offered in the post-Congress tours which have been arranged to follow the closing session of the Fourth World Poultry Congress, to be held in Old London, England, July 22nd to 30th this year.

Two tours have been arranged, one following the other. The first starts July 31, and takes one through the historic, storied and scenic wonderlands of the British Isles. The Shakespeare country, North Wales, Dublin, with its Rocky Road; the Irish Free State, youngest of the British Dominions; Cork and the lovely lakes of Killarney; the Giant's Causeway, and, of course, the Blarney Stone will be on the route. Crossing again to Scotland, Glasgow and the Burns country is viewed; the Trossachs, Edinburgh, the English Lake Country, and Liverpool provide days full of wonder and amazement. This part of the tour returns to London, August 10.

Then comes the visit to the continent which begins with a twenty-four hour stay at Brussels. From Brussels the quaint Holland country is visited, then the party proceeds to the lovely Rhine Valley country, passing on the way up that river the historic cities of Cologne, with its cathedral, and Bonn with its world-famous universities, both places which were held by troops of the Canadian Expeditionary Force immediately following the armistice. Frankfurt and Munich are also visited, then the party proceeds to Oberammergau for Sunday, where they will be privileged to view the famous Passion Play, which exemplifies what is regarded by most of us as the greatest event of all history. Returning the party are guests at a government reception at Munich before proceeding to Switzerland for a four-day stay, which will include a visit to Geneva, seat of the League of Nations. From Switzerland the party return to Paris, where another four days will be spent.

The Paris visit may be cut in half and those desiring to do so will be afforded an opportunity of a two-day tour of the battlefields of the Great War. To most of the party this visit to the battlefields will be the climax of what all will regard as truly the opportunity of a lifetime.

Origin Of Word "Britain"

Evolved From "Pretania" Used By Pytheas Centuries Ago

In a private study class in Charlottetown, Prince Edward Island, an interesting discussion was had on the question of how the name of Great Britain originated. We speak of Britannic, Britain, the British Isles, the British Empire and so on, but how and when did the name of Britain, from which all these words and phrases were evolved come into use? After much research the class were informed that Britain had no name until Pytheas, 24 centuries ago, seeing its painted people, wrote of it as the Pretania Isles (the Isle of Painted Men.)

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.D., writes:—"Several years ago I was troubled with my heart and nerves and so that I had cold hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price: Six a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Does Not Help Much

Diets change. People used to eat to appease their appetites. Now they eat this for calories and that for vitamins. A chicken sandwich used to be two slices of bread and a slice of chicken. Now a couple of leaves of lettuce must be stuck in between the meat and the bread. Of course, it is better, but people still die too young.

Pulverized Fuel Plant

The Government of British Columbia has set aside the sum of \$12,000 to place a pulverized fuel plant in one of the larger coastwise towns, to experiment with the use of pulverized British Columbia coal in marine work.

They call her Mussy Lena, 'cause she's the Fascist girl in town.

"Curse Of The Pharaohs"

Superstition Has Been Revived With Death Of Lord Westbury

The legendary "Curse of the Pharaohs" placed on despoilers of ancient Egyptian tombs and those connected with them was recalled when 77-year-old Lord Westbury went temporarily insane and leaped 100 feet from his bathroom window.

The peer, grandson of Queen Victoria's noted Lord Chancellor, fell seven stories, crashing through the glass roof of a veranda and knocking down a charwoman who was cut and bruised. He died instantly.

Lord Westbury had brooded over the death, less than three months ago, of his son, the Hon. Richard Bethell, 46, who died, apparently in his sleep, in a room at a club. Richard had been secretary to Howard Carter, who excavated the tomb of Pharaoh Tut Ankh-Amen, about 10 years ago.

Several Egyptian art works given him by Richard were in the apartment from which Lord Westbury fell to his death.

The Pharaohs' "curse," symbolized by the beetle or scarabaeus began to take effect soon after King Tut's tomb was discovered. One person after another died suddenly or mysteriously, so that even scoffers at superstition began to wonder whether the curse might not be real.

Lord Carnarvon died of an insect bite received just as the expedition was ready to open the tomb. The Hon. Aubrey Herbert, his half-brother, died later.

Fourteen deaths, including that of Lord Westbury, have been attributed by the superstitious to the famous curse.

(By Anabelle Worthington)

3315

A navy blue wool crepe that employs scalloped border in vivid rose shade is strikingly smart for that important age of 8, 10, 12 and 14 years. The red crepe appears again in belt that marks the normal waistline and in piping of collar, flared cuffs and bow tie.

The straight bodice suggests a basque. The skirt is circular, shaped with flatterer fullness at hem.

Style No. 3315 is just as smart as can be. It is practical too. It is just the thing for classroom and will make an attractive outfit for Spring without a topcoat.

It is very fashionable in wool jersey in hunter's green with white plique collar and cuffs. Tweed in beige and brown check in lightweight with collar, cuffs and border cut on the bias is fetching, worn with a brown suede belt. Pipe the border at upper edge, and collar and cuffs around the outer edge with brown bias binding that comes already folded for this purpose.

Sportswear linen in tan with brown trim is very attractive. Wool challis print with plain challis, printed and plain rayon crepe, checked and plain gingham, flat silk crepe and chambray also suitable. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

"Speaking Book" Demonstrated

Different System Of Recording Sound Has Been Discovered

What is practically a "speaking book" was demonstrated recently. It consists of an apparatus designed to bring literature to the ear instead of to the eye, and the system of recording sound differs from others, use being made either of a thin steel wire or for synchronization purposes—a steel tape. Speech and music can now be bottled and preserved if necessary for years, simply by using a coil of wire that can be folded and placed in a waistcoat pocket. The instrument is simple: The wire, or metal strip, is contained on spools. The recorder speaks into a microphone, and as the wire passes through the magnets, the sound is impressed on it by electromagnetic means. Sounds impressed on the wire will not wear off; any number of "copies" can be made and there is no limit to the possible length of the record. Entire plays, operas, speeches and so on can now be reproduced.

Recipes For This Week

(By Betty Barclay)

MANHATTAN PUDDING

- 1 1/2 cups orange juice.
- 1/2 cup lemon juice.
- 1 1/2 cups powdered sugar.
- 1 cup heavy cream.
- 2 cups chopped burnt almonds.
- 1 teaspoon vanilla.

Dissolve 1/2 cup sugar in fruit juices. Turn into chilled mold or can of ice cream freezer. Whip cream, add remaining sugar, almonds and vanilla; pour over first mixture, seal tightly; pack in equal parts of ice and salt for 3 hours.

BEEF RELISH

- 1 cup cooked beefs.
- 3 tablespoons horseradish.
- 2 teaspoons powdered sugar.
- 1 teaspoon salt.
- 4 tablespoons lemon juice.

Chop the beefs, which should be cold, and add other ingredients. Serve with cold sliced meat.

Buck—Can you give me a definition of an erator?"

Private—"Sure. He's the fellow who's always ready to lay down your life for his country."

The Latest In Houses

Model Exhibited In Copenhagen Depletes Homes Of The Future

A full-sized model of a wholly new type of house, "designed without regard to popular prejudice," was one of the novelties at the recent House and Building Exhibition in Copenhagen. The house is circular in form, with a flat plastic glass roof. The entrance corridor leads to a central hall, from which the other rooms open, following the course of the sun, according to the use for which the rooms are intended. On entering the corridor one steps on a perforated rubber mat, the pressure starting an electrically operated vacuum underneath which removes dust from the boots.

Here are some of the other novel features: Beds, which are supplied with rubber air mattresses, are let into alcoves, and a radio apparatus is fitted into a niche beside each. In the parlor is a glass-top table on steel legs, the top so adjusted that it will revolve and bring to hand anything lying on the opposite side. This room is equipped with magnavox and television apparatus. Alongside is a suction tube connected with the local post-office for reception and despatch of letters.

A circular over-room in the centre of the roof, reached by an elevator, provides sleeping accommodation for the children, and gives them direct access to the roof games. On the top of this over-room there stands a heliograph, provided with suction feet to hold it fast in case of storm. Antennas over the roof pick up electric energy transmitted wirelessly for the lighting and heating of the house, and all sorts of auxiliary services.

Plant Combats Sea

Raises Level Of Land Until It Becomes Dry

In South-East Essex, England, where much of the land lies below the level of the sea at high tide, an interesting experiment in protection from sea erosion is being made. A plant, known as Spartina Townsendii, has been placed in various spots where the sea encroaches. This curious grass-like vegetation is able to take root even in mud where a mar must sink and, after getting a grip, it raises the level of the mud several inches a year, until eventually, it becomes high and dry land. Features that have been lost for many centuries are now being regained by the help of this friendly plant.

Manitoba To Celebrate

The 66th anniversary of Manitoba's entry into Confederation will probably be made the outstanding feature of the Provincial Exhibition, at Brandon this year. A pageant representing historical events and other extra attractions are under consideration by the directors.

Car Salesman: "Our cars no good? Why we're selling them by the dozen."

Prospective Buyer: "I'm not surprised. How much are they a dozen?"

Stronger Than The Empire

Commonwealth Of Nations Has Been Wonderful Step Forward

Probably few British statesmen fifty years ago believed that the decentralizing of the Empire could go as far as it already has gone without disaster. Certainly, most statesmen of other countries agreed with Bismarck, who thought that the yielding of power by the central authority was a sure sign of weakness and decay. If he could have seen the Canadians holding out first the mysterious horrors of the first gas attack, or the Australians helping to smash the Hindenburg line, he might have changed his mind. To date, the ties created by sentiment and enlightened self-interest have more than replaced the bonds of compulsion laid aside as outworn. The Commonwealth of Nations is stronger than the Empire.

Making Plans For Congress

Dairymen Of World To Meet In Denmark Next Year

The International Dairy Congress which was planned to take place in Denmark in July, 1931, is to be held under the patronage of His Majesty King Christian X, and with the present Danish Minister of Agriculture, Mr. Kr. Bording, and the former Danish Prime Minister and Minister of Agriculture, Mr. Madsen-Mygdal, as Honorary Presidents. The invitations to participate in this Congress are extended by the Danish Dairy Industry to all countries. Like the preceding International Dairy Congress, this Congress is going to be held under the auspices of the International Dairy Federation, and this Congress will be organized by the Danish section of the said Federation and the Organizations of the Danish Dairy Industry in co-operation with the Danish Government.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

DISTINGUISHED VISITORS TO WEST INDIES

Three unusual views of Their Excellencies, The Governor-General and Lady Willington, taken while on a three weeks' cruise of the British West Indies. Scene No. 1 shows His Excellency Lord Willington, as he bids good-bye, from the rail of the Canadian National Steamship "Lady Drake," as she leaves Bermuda carrying Their Excellencies on the last leg of their West Indies cruise. Scene No. 2 shows His Excellency indulging in a show of enthusiasm as he scores a ringer in a game of dock quiz. Scene No. 3 shows Lady Willington with one of the little picanniny girls of Jamaica who called on the distinguished visitors to bid them welcome.

Main Street

Mr. H. Kasten returned Tuesday after spending a week in the City. Mr. E. L. Elford has been confined to his home for a few days with a very bad cold.

Born to Mr. and Mrs. F. T. Thurston, Saturday, March 1st, a daughter.

Mrs. W. Frickleton, representative from Irma Rebeckah Lodge No. 87 attended the General Assembly held in Calgary recently.

Ladies Aid will meet at the home of Mrs. S. G. Simmons on March 13th. Everyone welcome.

The Times has a quantity of old reading matter, any of our readers wanting some can have a supply by calling at The Times Office.

Mr. Ben Sather is spending a couple of weeks in Regina, Saskatchewan, where he is attending the Chevrolet school, given by the General Motors.

Clothes don't always make the man when in town. Refresh yourself: Try a First Class Meal or Lunch at the Hotel Irma.

Mrs. J. Hubman, who has been taking treatment at the Hardisty hospital is slightly improved during the past week but expects to be unable to return home for some time.

Mr. Kiefer is having his Irma theatre equipped with the latest talking machine equipment and expects to be ready for operation by May. This will be the first theatre along this line to give all talking pictures.

Last Saturday Mrs. J. W. M. Burn met with a painful accident when she fell while going down cellar. Mrs. Milburn broke two ribs and shook herself up considerably. Dr. Greenberg was called and soon relieved her.

Talkies in Irma! What! Talkies! Reserve the date, March 11th and watch for further particulars.

Lawrence Nash broke his ankle on Friday last while riding a horse to Jarow.

Monday a unique event took place with the commencement of the daily air mail service between Edmonton and Winnipeg. The planes carrying the mail pass over Irma each way about 1 p.m. A saving of practically 24 hours is made between Edmonton and Winnipeg and the planes stop at Battleford, Saskatoon and Regina, picking up and leaving mail for each of these cities. Another route has been established from Winnipeg to Calgary stopping at the principal cities between the two Capitals.

Yes! that Talkie Program will be in Irma on Tuesday, March 11th, at 8 p.m. in the United Church. There will be 7 reels of motion pictures accompanied by music by talking picture equipment, and 4 reels of talkies. The price of admission will be: Adults 35c, Children over 12, 25c; children 12 and under, 15c. The program is given by the University of Alberta Extension Department, and is being sponsored in Irma by the Senior Boys Class in the Sunday School. Don't be a stiff. Come and squeeze in and support the boys in their efforts to give you a good time at small cost.

KINSELLA

Mr. Jack Stronach left on Saturday evening for Rocky Mountain house where he has accepted a position as teacher.

Mr. Justik spent Saturday at Killam.

Mr. and Mrs. Lundy Beschell of Killam spent Sunday with her father Mr. V. Justik.

Mr. Kelley of the B. & B. Dept. of the C. N. R. has been here with his outfit putting a ball float on the water tank.

The thermometer registered 17 below zero on Saturday morning, but the weather has turned milder again.

ALBERTA MOUTH

HEALTH CAMPAIGN

An Essay Contest open to all school children in Alberta from Grade VII up, is being conducted in connection with the Province-wide Good Health Campaign under the auspices of the Canadian Dental Hygiene Council, working in co-operation with the Provincial Department of Public Health and Education, and the Alberta Dental Society.

For the purposes of this Essay Contest, the Province has been divided into twenty-two districts, and a prize of ten dollars will be awarded for the best essay in each district. These prize winning essays will then be submitted to the central committee at Edmonton and the one adjudged to be the best in the Province will be awarded a further prize of twenty five dollars. (\$25.00).

The subject of the essay is "Mouth Health" which is the title of a new Bulletin just issued by the Provincial Department of Public Health. Essays must not exceed 750 words in length.

OTTAWA MAY SHARE

HEALTH UNIT, COSTS

H. E. Spencer, M. P. Battle River, receives Support for Resolution. Spirited discussion of the part which the federal government should play in health matters, enlivened the house of commons for a short time last evening. The basis of the discussion was a private member's resolution, which met with the support of nearly all speakers.

Moved by H. E. Spencer, U.F.A., member for Battle River, it merely asked the house to declare that "the government should take into consideration the advisability of making grants to the provinces equal to one-third the cost of establishing, and to cover permanently, such full time health units as may be organized." The motion passed without revision.
